

1 $\frac{3}{4}$ " pipe to cyclone notch

Patterns when cut out and wrapped around 1 $\frac{3}{4}$ " or 44,5mm OD pipe provide a cutting/notching guide.

If the pattern outlines are not exactly 140mm when printed to A4/Letter or do not quite meet when wrapped around the pipe, then print document again with a custom scale to adjust.

Note that scalling the template to fit a different pipe diameter will result in an inaccurate cut angle.
